

Year 2 Home Learning Challenge Autumn 1 – Fire! Fire!

Please look at the list below and select one activity that your child would like to do at home (or choose something else based on our Unit). **We would love it if you could support your child in completing this project but please ensure they have overall responsibility for whatever they produce.**

- Make your own 2D/3D Tudor house using materials of your choice.
- Make a fact file about what London was like in 1666 – what were the houses like? What jobs did people do? What equipment was used to put the fire out?
- Make a poster for ways to stay safe in a fire.
- Design your own new city. How would you design your new city to help prevent the spread of fire?

Please note that final submission for this home learning challenge **Friday 20th October** where all children will be given the opportunity to share their learning with the whole class.
