

Home Learning Challenge: Spring

Please look at the list below and select one activity that your child would like to do at home. **As this is a short term, we would like you to complete 1 activity for the entire Spring term.** We would love it if you could support your child in completing this project but please ensure they have overall responsibility for whatever they produce.

- Make a habitat for an animal of your choice
- Create a poster identifying dangers to animals around the world.
- Research an extinct animal
- Make a model of the water cycle and the process of evaporation and condensation in the water cycle.
- Research famous rivers around the world and create a poster

Please note that final submission for this home learning challenge is **Friday 15th March 2024** where all children will be given the opportunity to share their learning with the whole class.
